Homeopathy for Colds & Flu

Homeopathy Tips for Colds and Flu.

It's that time of the year again when cold and flu viruses seem to be widespread. If you are to help reduce symptoms or shorten the duration of these viruses, homeopathy has history of acting such as during the 1918 Influenza Pandemic. At that time, *Gelsemium* was one of the main remedies used successfully by homeopaths for the flu.

If you would like to read more about how homeopathy has been effective in this and other epidemics, check out the National Center for Homeopathy (www.homeopathycenter.org).

Remedy combinations by such companies as Hyland's and Boiron are also something to consider as they contain a mixture of several remedies that can cover many symptoms. Check out Hyland's 4 Kids Complete Cold'n Flu and several other combination remedies offered at our store. Another consideration is Oscilloccocinum, by Boiron. This remedy is a homeopathic medicine that has been subjected to clinical trials and proven to have significant results as compared to a placebo when used for influenza. Be sure to have some on hand to use at the first sign of the flu.

Class Offering: A homeopathic study group will begin on Monday, February 19th at 7pm for 6 weeks. This class will meet virtually on line or you may join by phone. For more information, contact Kate (kate@oilpress.co).
